- Consulting

Ask us about EMR options

Proven reliable

We work with small to medium-size healthcare organizations in the upper midwest. Since 1998 we have acquired a clientele of more than 70 medical providers. The "over 90 days" A/R for our billing clients is less than 10% of their overall aging!

Eliminate guess work

ORI's staff of 25 professionals stays current with all the payer changes and billing certification through the American Medical Billing Association to ensure compliance. Our technology is current, and we constantly monitor the quality of the client's data. We hold the payers and patients accountable to ensure that you receive payments on a timely basis.

Customized service

We understand that each practice has different needs. We consider your specific needs and payer requirements. We design the relationship around the facts. The options are endless!

Stay focused on serving your patients

Your staff schedules appointments, registers patients, collects co-pays and codes the charges. Next, scan the completed charge tickets to our office. We take care of the rest! Your staff saves time, which allows for a larger number of visits. More patient visits... combined with our advanced billing techniques... will yield increased revenue for your practice!

Call an ORI sales consultant today to learn how you can save 10-15% off of your bottom line by having us handle your business office tasks.
